

I respectfully urge the FCC to reject the NAB's petition 04-160. I use XM Radio and really appreciate being able to check on the weather and traffic in the city before I arrive. Satellite radio is really a great advance. Traveling in a car it is a boon to not have to worry about changing stations every 50 miles. Being able to get news, financial information and weather 24/7 any where in the U.S. is awesome. Please do not let the interests of the NAB interfere with my enjoyment of Satellite radio. Thank You. James W Simmons
